PROFILE

I am an experienced frontend, Backend Developer and a DevOps engineer with over 2 years of expertise in Java, Python, Javascript, React and Typescript, Springboot, AWS. I had a diploma computer Science. I have successfully completed Solution implementations for various projects, and I am experienced in the entire software development life cycle, from requirements gathering to deployment. I am actively seeking a new opportunity as a backend developer ,frontend developer, devOps engineer where I can leverage my skills to create high-quality, robust, and scalable applications

EDUCATION

Computer Science Zeccon Computer Institute; Jos, Nigeria, Jos	Jan 2014
Software Engineering graduate Semicolon Africa; Lagos, Nigeria, Lagos	Sep 2023 – Present
Science Laboratory Technology Federal Polytechnic Bauchi, Bauchi	Sep 2020 – Sep 2023
Business Management and Entrepreneurship London University of reading, Henley Business School	May 2024

EMPLOYMENT

Software Engineer Semicolon Africa, Lagos, Nigeria Engaged in both frontend and backend development tasks, leveraging a diverse skill set to ensure comprehensive contributions to project success. Implemented a scalable Back-end architecture using the Multi module architecture model. Developing secure REST API using java/spring-boot and Json web Token (jwt) Writing unit tests and integration tests respecting TDD with Junit and BDD with Mockito and Junit framework, which resulted in faster development cycles. Developing back-end Restful APIs (Java /Spring boot) API documentation (Postman documentation) Spearheaded the implementation of identity verification functionality, designing and coding the verification system from scratch an identity verification platform. I also engaged in DevOps being able to secure projects using AWS security, creating environment on AWS terminal for projects and also deploying projects on AWS environment.	Sep 2023 – Present
Software Engineer Semicolon Africa, Lagos, Nigeria	Sep 2023 – Present

Played a pivotal role in developing software solutions , a platform connecting artisans with people in * need of their services. Engaged in Java development tasks, utilizing the language's versatility and robustness to build scalable and efficient backend * systems. High-quality financial apps were created and maintained using Spring Boot, Maven, and PostgreSQL, which increased developer * productivity and code maintainability. Actively took part in code reviews and applied best practices, which improved the fintech projects' code quality, decreased * technical debt,verall code maintainability. Introduced and put into use continuous integration tools like Jenkins and automated testing frameworks like JUnit and Mockito * to ensure thorough test coverage and quick delivery, significantly improving codemaintainability and allowing for future improvements. Developing back-end Restful APIs (Java /Spring boot)

Photo Laboratory Editor

Sep 2015 - 2018

Amono, Bauchi

I enjoy editing pictures, making them look beautiful. When a picture is brought and asked to either change the background, redress the image, there is a kind of joy that fills your heart to just make the person happy. Making the customer happy is the goal.
